Admin & CSR Panels (God Mode Menus)

> [NOTE] This page is a staff reference. These panels only open for accounts on the staff list; regular players will not see them.

What's New

Entering god mode no longer floods your chat window with text or requires memorizing obscure commands. Activating it now opens an interactive menu matched to your staff role.

Role	Panel that opens
Developers and Administrators	Admin Panel
Customer Service Representatives and GMs	CSR Panel

How to Access or Use

1. Type `/setgod` to enter god mode. The matching panel opens automatically.
2. Closed it by accident? Say the panel name in local chat to bring it back:

Say this	Opens
`admin` (also `panel`, `menu`)	Admin Panel (higher staff roles)
`csr` (also `csrpanel`)	CSR Panel
`qa` (also `qatool`)	QA Testing Suite (higher staff roles only)

Admin Panel highlights

- **Quick spawn** of the Character Builder Terminal ("Blue Frog") into your inventory.
- **Shortcuts** to the CSR Panel and the QA Panel (cancelling the QA root menu returns you to the Admin Panel).

- **Item and object tools**: spawn static items by name or template, persist or destroy world objects (both ask for confirmation first).
- **Player operations**: badges, tokens, faction standing, instance flags, respecs, heal and revive.
- **World, quests and diagnostics**: ground spawners, space station warps, quest reset or restart, animation tests, object inspection, and a clean god-mode off switch.

CSR Panel highlights

- **Player assistance**: summon a player, go to a player, warp to cities.
- **Item restoration**: restore recently deleted items and retrieve stuck items.
- **Moderation**: temporary account restriction, player info, cloak.
- **World fixes**: snap stuck objects to terrain, despawn bugged objects.
- Higher staff roles get a **Back to Admin Panel** entry at the top.

See also the **CSR Toolkit** page in this book for the full tool descriptions.

FAQ and Known Details

- **Do I need to run `/setgod` every time?** No. Once god mode is active, say `admin`, `csr` or `qa` to reopen a panel. Running `/setgod` again also redisplays it.
- **Who can use the QA Panel?** Higher staff roles only. Others receive a notice that permission is required.
- **Can I delete something by accident?** Permanent deletes and database persistence require a YES/NO confirmation.
