Hutta Planetary Resources

What's New

Hutta now has its own set of planetary resources. Crafters and explorers can survey the marshlands, harvest native creatures and deploy harvesters to gather materials unique to the planet.

Category	Resources
Organic and creature	Huttan meats (domesticated, wild, carnivore, herbivore, reptilian, avian, egg, insect), hides, bones, milks
Flora and woods	Swamp corn, rice, oats, wheat, vegetables, beans, tubers, fungi; deciduous, conifer and evergreen woods
Industrial inorganics	Liquid and solid petrochemicals, radioactives, steel, iron, aluminum, copper, extrusive and sedimentary ore, fiberplast, water vapor
Renewable energy	Smog wind (wind turbines), filtered solar (solar arrays), toxic vent geothermal (geothermal harvesters)

How to Survey and Harvest

1. Equip a Mineral, Flora, Chemical, Gas or Energy survey tool while on Hutta to find concentrations.
2. Slay native creatures and choose **Harvest Meat**, **Harvest Hide** or **Harvest Bone**.
3. Place a harvester on a surveyed hotspot to automate extraction.

FAQ and Known Details

> [NOTE] Resource spawns rotate over time, as on every other planet. Survey again if a hotspot runs dry.
