Nal Hutta Space

What's New

Pilots can launch into **Nal Hutta Space** (`space_hutta`), a Level 5 veteran sector above Hutta.

Location	Description
Bilbousa Spacedock	Orbital station near the starport corridor: repairs and landing clearance
The Smuggler's Shroud	Ionized nebula that degrades sensors and drains shield capacitors
Cartel Freighter Graveyard	Debris field popular with scavengers and ambushes
Hutt Mining Belts Alpha and Beta	Silicic and carbonaceous space ore
Cartel and pirate patrols	Tier 5 Hutt gunships, Black Sun interceptors, corsair wings

How to Access

- **From the ground**: use the starport terminal or dispatcher at Bilbousa Starport on Hutta and select **Launch Starship**; you arrive near Bilbousa Spacedock.
- **By hyperspace**: plot a route from the navigation computer to Shadowport Anchorage (`space_hutta_0`), The Smuggler's Gate (`space_hutta_1`) or Cartel Redoubt (`space_hutta_2`).
- **Docking**: get within 400 m of the spacedock, target it and press Comm (`C`). Choose **Request Landing Clearance** or **Starship Repairs** (25/50/75/100%).

Flight Advisory

> [WARNING] Veteran difficulty. Stock or lightly shielded ships are at real risk.

- Sensors are weaker inside the nebula; watch for tracer fire. - Ion lightning stresses hull and components; route power to shields or leave dense pockets. - Firing on neutral station installations or Cartel escorts draws heavy gunship fire.
