Secura Origins

The second Live galaxy: single character, 1x experience, no level shortcuts.

- Secura Origins

Secura Origins

> [Completed] Secura Origins is open on Live. It is a second galaxy that shares your login, your client and the same content as Secura Horizon, but plays as a single-character, 1x experience. Update through the launcher (version 4.3.0 or newer) before you log in.

What is Secura Origins?

SWG Secura Live is now two galaxies on one login:

- **Secura Horizon** is the galaxy you already know. Nothing about its rules changed.
- **Secura Origins** is new. It is built for a slower, more deliberate game: one character, standard experience rates, no level shortcuts and no class respec. Pick one profession, commit to it, and rely on other players for the skills you do not have.

Both galaxies run the same world, the same quests and the same Dynamic Quest campaigns. The difference is in the rules below.

Horizon and Origins side by side

Rule	Secura Horizon	Secura Origins
Characters per account	10	1 (deleting is free and the name can be reused right away)
Experience rate	5x	1x
Lots	15	10
Level-up boosts (veteran vendor 50 / 75 / 90 conversions, level-up orb, TCG instant-XP toy)	Available	Blocked
Class respecialization	Available	Blocked (the respec NPC no longer offers it; tokens, vouchers and the reset device are refused)
Expertise reallocation	Available	Available
Medic and entertainer buff terminals	Available	Removed

Rule	Secura Horizon	Secura Origins
TCG vendors	Available	Off
Heroic token, GCW token and GCW point bonuses	Bonus rates	Standard 1x rates
Unlocked character slot commands	Off	Off
Character transfers between galaxies	Not possible	Not possible

What is the same on both galaxies

- The world, content and Dynamic Quest campaigns, including the Hollow Crown, branching stories and group contracts and world events.
- The daily Secura Token, level rewards, the Elder buff, login gifts and holiday gifts.
- Instant travel inside cities.
- Crafting and reverse engineering rates.
- Your account: one login and password work on both galaxies.

How to join

1. Open the SWG Secura launcher and let it update to version 4.3.0 or newer.
2. Choose the Live option. The launcher shows the login server status plus separate status and population for Secura Horizon and Secura Origins.
3. Start the game and log in.
4. In the server list, pick **Secura Origins**.
5. Create your character. Origins allows one character per account.

The launcher's Sync Characters list shows characters for both galaxies, and auto-login picks the right galaxy for the character you chose.

> [NOTE] If the server list looks unchanged after the update, close the game, let the launcher finish its file check and start again. The new server list labels ship in a client patch.

Resources for both galaxies

Each galaxy has its own resource spawns, so check the galaxy you play on. Open **Resources** in the launcher (version 4.3.1 or newer) or on the website, then pick **Secura Horizon** or **Secura Origins**

with the selector. See Launcher 4.3.1 for details.

FAQ

Can I move a character between Horizon and Origins? No. Characters cannot be transferred in either direction, and staff cannot move them either. Choose the galaxy that fits how you want to play.

Do I need a new account? No. Accounts are shared. Use the same login on both galaxies.

I already have characters on Horizon. Can I still make an Origins character? Yes. The one-character limit on Origins counts only Origins characters, and your Horizon characters are not affected.

What if I delete my Origins character? Deleting is free. The name is available again immediately and you can create a new character.

Why can I not use the respec NPC for my class? Class respecialization is blocked on Origins to keep the choice meaningful. You can still reallocate your expertise points.

Are veteran rewards shared between galaxies? No. Veteran reward claims are tracked separately on each galaxy.

Are the daily rewards and gifts different on Origins? No. The daily Secura Token, level rewards, login gifts and holiday gifts are the same as on Horizon.

Is there a schedule for changes to Origins? No. SWG Secura is a hobby project and nothing here is a promise of future changes. Follow the announcements in Discord.
