v1.13.1 Live Update

> [Completed] The v1.13.1 update is live on Secura Horizon and Secura Origins. Run the launcher and let it finish before you log in.

A small follow-up to the v1.13.0 Live Update, which introduced staff-run live events.

What's New

Live events polish

- **Armies form up properly.** Event armies now line up with their officer leading from the front.
- **More precise event scenes.** Event staff can place formations more precisely, so scenes look more deliberate.
- **Better event sites.** Event sites on levelled ground are sized more accurately.

Fixes

- **Saved event setups.** Saved event setups now come back exactly as they were arranged, with everyone standing and facing where they were placed.
- **Stability.** A server terrain fix makes placing and removing structures and levelled ground more robust.

FAQ

Do I need to do anything? Run the launcher and let it finish before you log in.

Where can I read about live events? See the v1.13.0 Live Update.
