# v1.13.2 Live Update

> [Completed] The v1.13.2 hotfix is live on Secura Horizon and Secura Origins. Run the launcher and let it finish before you log in.

A small hotfix that follows the v1.13.1 Live Update.

# What's Fixed

- **Commercial Resource Silo Deed.** Using the deed no longer crashes the game, and the silo can be placed again. Placing a silo needs a clear spot the size of its placement preview.
- **Incubator.** A newly placed incubator now offers its first Experimentation session. Previously the option never appeared.
- **Login welcome window and loading screen.** The welcome window at login and the message of the day on the loading screen now show the current update.

# What You Need To Do

Start the launcher and let it finish updating. It downloads two small updated archives the next time it starts. After that, log in as usual.

# FAQ

**Does this apply to both servers?** Yes. Secura Horizon and Secura Origins both received the hotfix.

**My silo deed still will not place.** Move to a clear spot that fits the whole placement preview and try again.
