v2.0.1 Live Update

> [Completed] v2.0.1 is live on Secura Horizon and Secura Origins. This hotfix restores crafting schematics, profession abilities, reverse engineering and entertainer content that went missing in the move to the skill system. Run the launcher and let it finish before you log in.

This update follows the v2.0.0 Live Update. Existing characters receive everything they qualify for the next time they log in, with nothing to claim or train again.

FAQ

Do I need to retrain my skill boxes? No. Restored content is granted on the boxes you already hold.

I am a crafter and still miss a schematic. What should I do? Log out and back in once, then report it with your profession and the schematic name.

Does this apply to both servers? Yes. Secura Horizon and Secura Origins both received v2.0.1.

Where do I report a problem? Use the usual bug report channel on the SWG Secura Discord, and say which profession or skill box was involved.
